Conference objectives

In previous conferences project team presented results of survey on state of sites with mosaics in partner countries, data base of mosaic heritage in the region, experts exchanged their experience in conservation of mosaics and proposed future actions. In this conference, it is planned to discuss very specific topic in conservation of mosaics which is presentation of detached mosaics on movable supports. This topic is chosen because experts in field of conservation of mosaics are all faced with problem that today there is a great number of detached mosaics which are not being conserved or adequately stored. For that reason, it is necessary to discuss possibilities of appropriate methods of their conservation-restoration as well as best methods for their presentation.

Conference topics

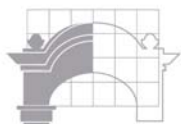

- Conservation-restoration techniques for mosaics
- Past and present solutions for detached mosaics
- Present challenges of detached mosaics on movable supports

Expected results

Continued networking of specialists involved with mosaic conservation created with the objective to strengthen international cooperation in training of conservators, conservation and presentation of mosaics in the region of Southeast Europe. Specific conservation problems will be treated by conservation professionals which will help them to improve knowledge regarding modern approach to mosaic conservation.
